

United States
Consumer Product Safety Commission

eFiling Overview

Remarks: This presentation is intended for compliance training purposes only, to support educational awareness and advance preparation. The information presented is based on guidance and inputs from U.S. Consumer Product Safety Commission (CPSC) officials.

Agenda

- What is eFiling?
- eFiling Roles and Responsibilities
- Types of Message Set
- WHY eFiling? What Must Be Certified?
- Types of Certificates & Under What Citations?
- What Elements that Certificates Must Have?
- How To Initiate?
- Steps for Creating the Business Account at CPSC/ACE Platform
- eFiling Support Services from CPSC
- Q & A

What is eFiling?

eFiling is a CPSC initiative under which importers of regulated consumer products will electronically file (eFile) data elements from a certificate of compliance with U.S. Customs and Border Protection (CBP), via a Partner Government Agency (PGA) Message Set. Importers will be required to eFile Certificates of Compliance for most regulated consumer products on July 8, 2026.

eFiling – CPSC's Modern Approach for Filing Certificate Data

Data stored electronically in the secure CPSC Product Registry

Multiple options for electronically filing a PGA Message Set before a shipment arrives

Real-time data capture and streamlined processes for Trade

Easier compliance with CPSC's certification requirements

eFiling Roles and Responsibilities

The eFiling initiative may change the way importers communicate product certificate data between their trade partners.

Each trade partner plays a critical role in the flow of information throughout the eFiling process.

See CPSC’s suggested roles and responsibilities for importers and their trade partners.

NOTE: While the importer is ultimately responsible for certifying and eFiling their product certificate data, trade partners may act on behalf of the importer for certain eFiling tasks such as certification in the Product Registry and filing Message Sets into the ACE system, if granted appropriate permissions.

Stakeholder Role	Key Responsibilities
Importer <i>Manage and oversee flow of data and eFiling process to prepare for entry</i>	- Engage and communicate with trade partners to provide awareness and guidance on eFiling - Implement updated business processes to support new eFiling roles to include Compliance and Customs teams, if applicable - Oversee system integration planning and execution - Identify the CPSC regulated products that fall within the scope of eFiling - Provide management, certification, and oversight on product certificate data flows to ensure successful transmission of Full PGA Message Set or Reference PGA Message Set in CBP ACE
Broker <i>Collaborate, communicate, and file certificate data on behalf of importer</i>	- Work with importer to identify CPSC regulated products that need to be eFiled - Establish data flow with importer to ensure all data elements for Message Set are communicated timely and accurately - Track shipments through the supply chain to ensure shipment data is ready to file at time of entry - File Full PGA Message Set or Reference PGA Message Set at time of entry - Communicate with importer client(s) to ensure collaborative efforts across entire eFiling business process to include status updates, risk mitigation, and shipment tracking
Testing Laboratory <i>Gather, test, and transmit test report information</i>	- Gather data requirements for test report from importer - Identify products and corresponding citations per CPSC regulations - Collaborate with importer and broker to establish a data transfer protocol - Execute data transfer for all applicable test report details
Manufacturer <i>Provide all manufacturing details for applicable products subject to CPSC regulation</i>	- Gather data requirements for manufacturing information from importer - Collaborate with importer and broker to establish a data transfer protocol - Execute data transfer of manufacturer details for all applicable products identified - Ensure manufacturer information is provided accurately and updated as necessary
Software Developer <i>Develop, execute, and collaborate to integrate technical solutions</i>	- Create project plan that considers alignment with eFiling timelines - Lead coordinated integration and development efforts to update systems and align with eFiling requirements - Develop automated technical solutions to enable easier data transfers - Collaborate with all stakeholders to ensure IT architecture works as expected for successful submission of Message Set data

Importers are required to transmit Message Set data into CBP's Automated Commercial Environment (ACE) system at the time of entry. With the full implementation of eFiling, there will be **two options** to accomplish this:

Message Set	Data Entry Process	Recommended for...
Full PGA Message Set	• Importers transmit all required product certificate data elements directly into the Message Set for transmission into CBP's ACE system • All seven product certificate data elements are provided in the Message Set	• Participants who import a limited number of regulated consumer products • Participants who do not repeatedly import the same product
Reference PGA Message Set	• Importers enter product certificate data elements into CPSC's Product Registry, then provide the certificate's applicable Certificate Identifiers in the Message Set for transmission into CBP's ACE system • To enter product certificate data, the Product Registry provides the options to: ○ Manual upload via the user interface ○ Bulk upload via Comma Separated Value (CSV) file or Automated Programming Interface (API)	• Participants who repeatedly import regulated consumer products covered by the same product certificates

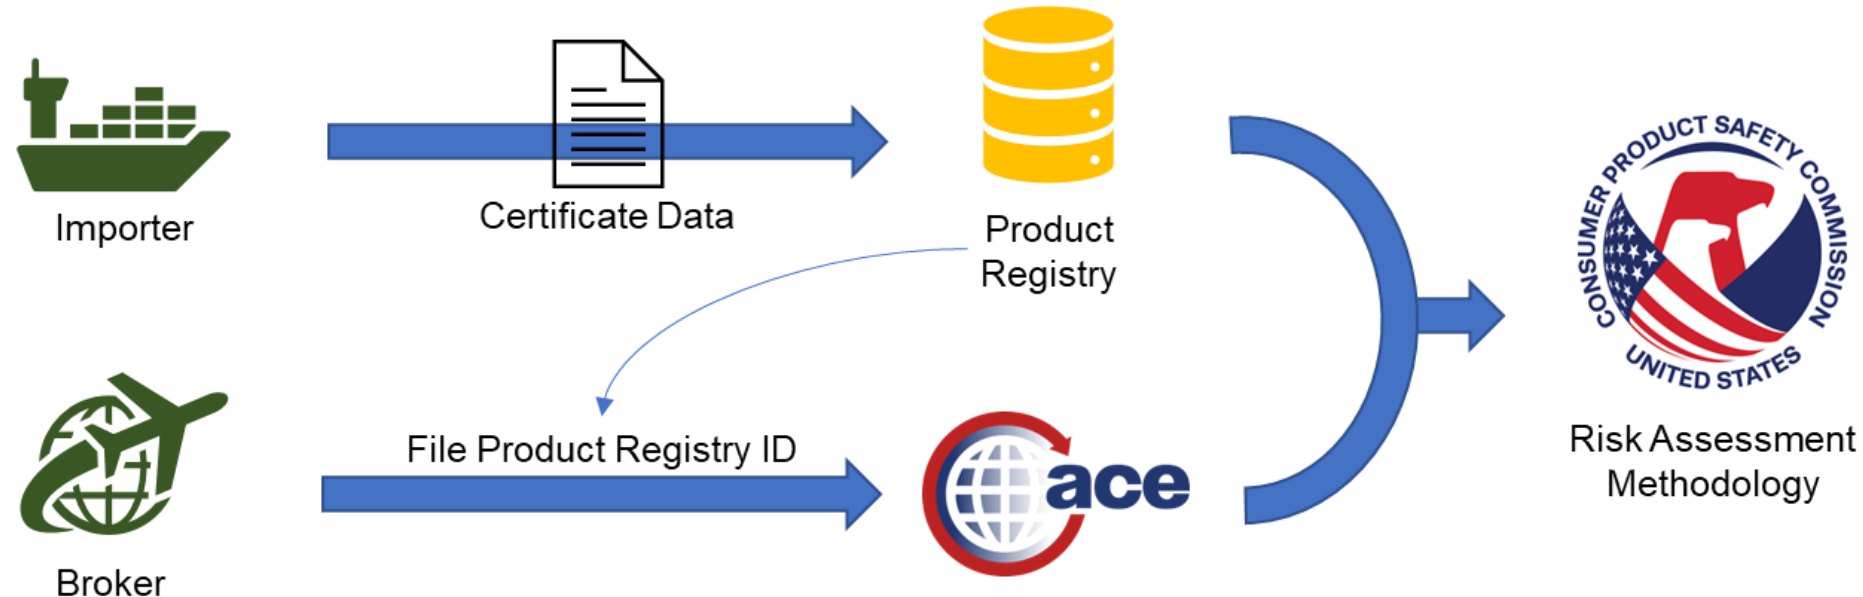

NOTE: CPSC assumes importers will be working with their trade partners including manufacturers, testing laboratories, brokers, software developers, and other third-party organizations to implement eFiling. CPSC does not oversee how trade partners support importers in the product certificate data entry process.

Option 1: Full Message Set

- import a limited number of regulated consumer products
- do not repeatedly import the same product

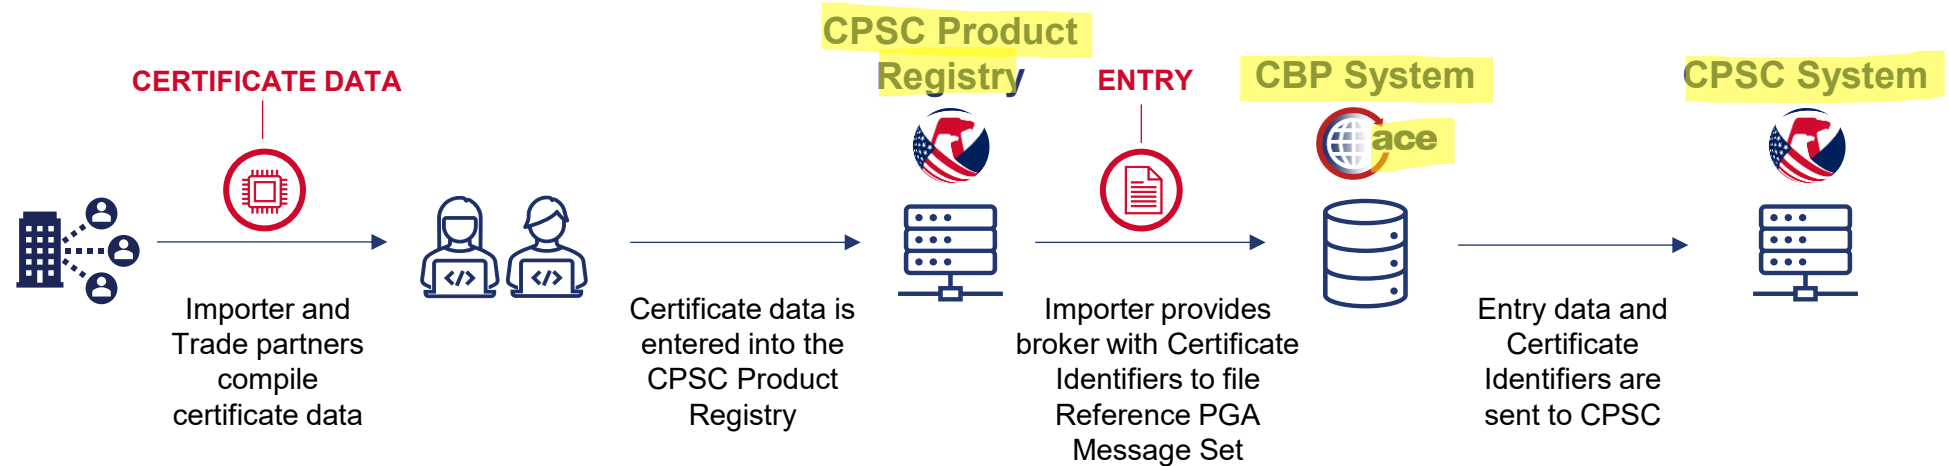

Option 2: Reference Message Set

- repeatedly import regulated consumer products covered by the same product certificates

Why eFiling?

eFiling a Reference PGA Message Set

Projected Benefits

Reduction in risk score

Reduced hold times

Fewer exams

Fewer holds to check for certificates

Greater focus on higher risk products

Reduced costs to the importer

What Must be Certified?

Products must be certified if they are...

Subject to a consumer product safety rule, ban, similar rule, standard, or regulation;

Imported for consumption or warehousing;

Or distributed in commerce.

Importers are responsible for certification.

Both importers and their trade partners should have a clear understanding of which standards need to be met.

All trade parties must know which mandatory standards apply to the products they are importing.

Types of Certificates

- Children's Product Certificate (CPC) - the manufacturer or importer certifies that its children's product complies with all applicable children's product safety rules (bans, standards, similar rules, or regulations).
<https://www.cpsc.gov/Testing-Certification/Childrens-Product-Certificate-CPC>
- General Certificate of Conformity (GCC) – the manufacturer or importer that its general use product (non-children's product) comply with all applicable consumer product safety rules.
<https://www.cpsc.gov/Business--Manufacturing/Testing-Certification/General-Certificate-of-Conformity-GCC>

Products Requiring a Children's Product Certificate

Children's Products:	Hand-held Infant Carriers
ASTM F-963	Highchairs
Lead Paint	Frame Child Carriers
Lead Content	Gates and Enclosures
Small parts	Imitation Firearms
Phthalates (child care)	Infant Bath Seats
ATVs (Youth)	Infant Swings
Activity Centers	Infant Walkers
Baby Changing Products	Mattresses – Crib and Youth Size (open Flame)
Bassinets and Cradles	Mattresses – Crib and Youth Size (smoldering)
Bedside Sleepers	Pacifiers
Bicycles (Youth)	Paint and surface coatings
Bicycle Helmets (Youth)	Play Yards
Bouncer Seats	Portable Bed Rails
Booster Seats	Portable Hook-On Chairs
Bunk Beds	Rattles
Carpets and Rugs	Sleepwear sizes 0-6X
Children's Furniture	Sleepwear sizes 7-14
Children's Folding Chairs and Stools	Sling Carriers
Clacker Balls	Small Parts
Clothing & General Wearing Apparel	Soft Infant and Toddler Carriers
Cribs	Toddler Beds
Dive Sticks	Toys
Electrically	Toys with Magnets
Operated Toys/Articles	Wearing Apparel – Children's Vinyl Plastic Film in Children's Apparel

Products Requiring a General Certificate of Conformity

Architectural Glazing	Lawnmowers
Artificial Emberizing Materials*	Lawn Darts*
ATVs	Matchbooks
Bicycles	Mattresses (open Flame)
Bicycle Helmets	Mattresses (smoldering)
Bunk Beds	Metal Candle Wicks*
Button Cell/Coin Battery	Multi-purpose Lighters
Packaging	Paint and Similar Surface Coatings*
Candles with Metal Wicks	Packaging Subject to the Poison Prevention Packaging Act
Carpets and Rugs	Portable Gas Containers
CB Antennas	Pool and Spa Drain Covers
Cellulose Insulation	Refuse Bins*
Cigarette Lighters	Refrigerator Doors
Contact Adhesives	Swimming Pool Slides
Consumer Patching	Vinyl Plastic Film
Compounds*	Wearing Apparel (Flammability) U.S. – CPSC 16 CFR Part 1610
Drywall	
Fireworks	*Products subject to ban
Garage Door Openers	Updated 10/11/2023
Inclined Infant Sleep Products*	

<https://cpsc.gov/Business--Manufacturing/Testing-Certification>

Certificates Must include

Product ID

Identification of the finished product

Citation Codes

Each consumer product safety rule to which the finished product has been certified

Manufacture Date

Date when the finished product was manufactured

Manufacture Place

Place where the finished product was manufactured, produced, or assembled, including the (1) name; (2) full address; and (3) contact information of the manufacturing party

Product Test Date

Date when the finished product was most recently tested for compliance

Testing Laboratory

Party(ies) used for testing a certificate per 16 CFR Part 1110, including (1) name, (2) full address, and (3) contact information of testing entity

Point of Contact

Contact information for the party maintaining records of test results, including (1) name, (2) full address, and (3) contact information

Note: as long as the certificate details are identical for the product, a certificate can be entered in the Product Registry once and referenced repeatedly as multiple shipments of the same product are imported

CPSC Product Registry

The CPSC Product Registry is a secure online application where importers can store and manage their product certificate data to transmit Reference PGA Message Sets to CBP's ACE system at the time of entry. Please note - the CPSC Product Registry serves as a stand-alone central data repository and *does not* communicate with CBP's ACE system.

Self-registration is currently **OPEN** and accepting new participants.

Registration Limit Notice: Note that self-registration for the Product Registry will close once the 2,000-participant limit is reached, in accordance with the limitations outlined in the [Federal Register Notice](#)

Establish a Business Account and join the CPSC Product Registry

Create a secure online account to input and manage your product certificate data.

Already have a Business Account?

[Sign in](#)

Preparation – Info. needs to know before Establish a Business Account

- Company Name:
- Initial Business Account Administrator's Name:
- Initial Business Account Administrator's Email:
- Importer of Record (IOR) Number(s):
- Broker Filer Code(s): Examples - Flexport (CHQ) & JD GROUP (BIM)
- Type of Products Imported: Adult Wearing Apparel

▼ Who Should Create a Business Account?

Please read the following statements and only proceed with setting up a Business Account after verifying that it is appropriate for you to do so.

- Business Accounts must be created by importers, as defined in the [eFiling Final Rule](#). Typically, the importer will be the Importer of Record (IOR) eligible to make entry for imported finished products under 19 U.S.C. 1484(a)(2)(B), who may be an owner, purchaser, or authorized customs broker. Please review the final rule for additional guidance.
- In most cases, multiple accounts should not be created to represent the same certifying entity. Please take appropriate steps to ensure your business does not already have a Business Account within the eFiling Product Registry.

☐ I have read and acknowledge the above statements and wish to proceed with the creation of a new Business Account.

Next

▼ Account Information

In order to create a new Business Account, you will also need to set up a user account within the Product Registry. Please provide the email address you would like to use for that account. As the initial Business Account Administrator, you will configure the account but will have the ability to invite additional administrators to share the responsibility of managing it once it is set up. Please also note the following:

- The email address provided should be a business address, not a personal one.
- This email address will also serve as your username within the Product Registry application and cannot be changed later.
- You will be required to verify ownership of the provided email account before accessing the Product Registry application.

Additionally, please provide the following information about your company:

Creating a Business Account*

Set Certifier ID to Complete Business Account

A unique certifier ID is required for every Business Account. A default based on your company information has been generated below, but you are free to replace it with your GLN, or another unique identifier for your company.

Important Points:

- Once a unique Certifier ID has been chosen, it cannot be changed
- Completing this step will make you an Administrator of the new Business Account
- Administrators should be employees of the company the Business Account represents

A finished product certifier may allow any entity or entities to view, enter, or maintain certificate data in CPSC's Product Registry on your behalf. Certifiers can also give these entities permission to invite additional entities to view, enter, or maintain certificate data on your behalf. Please be aware that, you, the finished product certifier, are legally responsible for the accuracy and completeness of any certificate data entered to enable CPSC to assess the compliance of consumer product(s).

Trade Party Management*

The screenshot displays the 'Trade Parties' management interface. On the left, a sidebar titled 'Trade Parties' contains a list of types: 'Manufacturers', 'Laboratories', and 'Point of Contacts'. Above this list are two buttons: 'ADD' and 'MANAGE'. A red arrow points to the 'ADD' button. The main area shows the 'Add New Trade Party' form. The form includes the following fields:

- Trade party name***: North Pole Labs (with a character count of 15 / 100)
- Select Trade Party Type***: A dropdown menu with 'Laboratory' selected.
- Alternate Id***: 01010101
- GLN**: A text field containing 'GLN'.
- Address line 1***: 101 North Pole Way
- Address line 2**: An empty text field.
- Apartment/Suite Number**: An empty text field.
- Country***: United States of America (with a flag icon and a close button).
- State/Province***: Maryland
- City***: Bethesda
- Zip/Postal Code***: 20814
- Phone***: 5711112222
- Email***: info@NPL.com

At the bottom of the form are two buttons: 'Cancel' and 'Save'. A red arrow points to the 'Save' button.

Adding Products to a Collection*

The image displays three overlapping screenshots of a web application interface, illustrating the steps to add a product to a collection.

Product Screenshot: The top navigation bar shows 'Product' as the active step. The form includes sections for 'Product Details' with fields for 'Product Name*' and 'Product ID Type*', and 'Additional Product ID and Type'. A 'Product Description' section is also visible. A 'Save and close' link is at the bottom.

Testing Screenshot: The top navigation bar shows 'Testing' as the active step. It includes a 'Certificate Type*' dropdown set to 'GCC'. The 'Laboratories' section has a 'Fake Lab' header, a 'Laboratory Type' radio button (selected), and a 'Laboratory Name*' field with the value 'Fake Lab - Raleigh, United States'. Below this are fields for 'Test URL', 'Test Report Key', and 'Add Citations:'. A '+ ADD A LABORATORY' button is at the bottom. A 'Save and close' link is also present.

Certificate Screenshot: The top navigation bar shows 'Certificate' as the active step. It includes a 'Version*' field with the value '1.6' and a 'Generate Version' button. Below is a 'Point of Contact for Test Result Records*' dropdown set to 'Importer'. A large text area contains a certification statement: 'I hereby certify that the finished product(s) covered by this certificate comply with the rules, bans, standards, and regulations stated herein, and that the information in this certificate is true and accurate to the best of my knowledge, information, and belief. I understand and acknowledge that it is a violation of federal law to knowingly and willfully make any materially false, fictitious, or fraudulent statements, representations, or omissions, on this certificate.' At the bottom, there is a 'Save and close' link, a 'Back' button, a 'Cancel' button, and a 'Certify' button, which is highlighted with a red arrow.
